Research-Grade Biosimilar Monoclonal Antibodies

Bio X Cell *InVivoSIM*[™] non-therapeutic antibodies are research-grade biosimilar monoclonal antibodies that have the same active biological component as the original therapeutic antibodies. Biosimilars make it possible to study the biological effects of a drug without the need to source an expensive pharmaceutical-grade therapeutic. Our *InVivoSIM*[™] antibodies feature greater than 95% purity and are free of preservatives, stabilizers, and carrier proteins. *InVivoSIM*[™] antibodies are screened for murine pathogens and protein aggregation, feature binding validation via Immunoblot and are guaranteed to contain less than 1 endotoxin unit per milligram. *InVivoSIM*[™] antibodies are for Research Use Only (RUO) and are not for therapeutic use.
