# CELL CYCLE CONTROL

p53 & p21  
antibodies

TRUSTED ANTIBODIES FOR CELL CYCLE RESEARCH

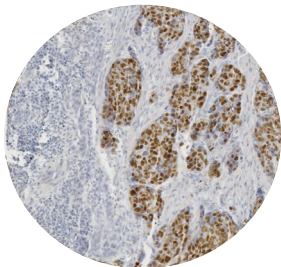

# p53 & p21

TRUSTED ANTIBODIES FOR  
CELL CYCLE RESEARCH

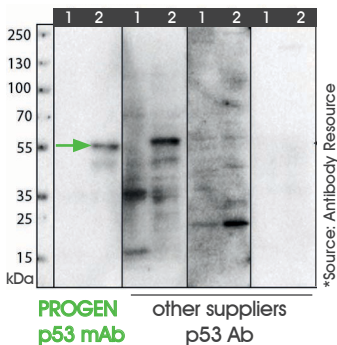

## p53 staining in human squamous cell carcinoma

(Image courtesy of J. Heß, University Hospital Heidelberg)

## Comparison of different p53 antibodies in western blot\*

1 C2C12 cell line, 2 HEK293T cell line

## p53 mouse mAbs

- Excellent marker for wild-type and mutant human p53
- Antibodies stain approx. 60% of investigated carcinoma
- Different antigens & application formats
- Publication records available

## p21 mouse mAbs

- Against full length recombinant p21/WAF-1 protein
- For IHC and Western Blot
- Different isotypes & formats
