The right choice
for Life Sciences

D.B.A. ITALIA s.r.l. opera nel mercato italiano dal 1984 offrendo un'ampia gamma di reagenti per la ricerca nei settori dell'Immunologia, Biochimica, Biologia Cellulare e Molecolare, Sicurezza Alimentare, Veterinaria e Cosmetica.
Distribuisce in esclusiva i prodotti di società leader del settore.

Proponiamo la gamma più aggiornata di:

Prodotti

- ▶ Anticorpi per WB e istopatologia su sezioni FFPE e criostatiche
- ▶ Anticorpi per citofluorimetria e immunoprecipitazione
- ▶ Anticorpi per studi in vivo
- ▶ Anticorpi monoclonali terapeutici e biosimilari
- ▶ Human, Mouse, Rat CD (cluster differentiation Markers)
- ▶ Fattori di crescita, Citochine, Proteine ricombinanti RUO e GMP
- ▶ Kit immunoenzimatici (ELISA), in chemiluminescenza, fluorimetrici, cell-based
- ▶ Kit di purificazione per DNA, RNA e Proteine
- ▶ Reagenti e accessori per PCR
- ▶ Reagenti per gene editing
- ▶ Enzimi di restrizione
- ▶ Reagenti chimici e biochimici
- ▶ Tubi per raccolta e stabilizzazione di campioni di sangue

Custom

- ▶ Anticorpi monoclonali e policlonali custom
- ▶ Peptidi e proteine custom
- ▶ Sintesi genica e CRISPR
- ▶ Custom library

Service

- ▶ ACROBiosystems – Solutions for Evaluation of CAR Expression
- ▶ SignalChem – compound selectivity profiling service, custom protein development, customized rAb production (siero, plasma e altri liquidi biologici)
- ▶ MedChemExpress – Compound Screening Services
- ▶ Creative Biolabs – Single Domain Antibody Service, de novo antibody sequencing, One-Stop CAR-T Therapy Development, RNA-seq, Membrane Protein Drug Discovery Services
- ▶ Biotem – Custom Antibody Production
- ▶ Bioserv UK – Hybridoma Sequencing
- ▶ Prosci – Single domain Antibody Services

SANTA CRUZ
BIOTECHNOLOGY
The Power to Question

www.scbt.com

Abbkine provides worldwide high-quality and affordable antibodies, experimental kits, proteins and other research tools for scientists in the field of proteomics and cytology.

Abcepta is a leading manufacturer of primary antibodies with more than fifteen years of experience. High quality antibodies and related products for drug discovery and academic laboratories worldwide. Research areas impacting health and disease, including cancer, metabolism, cardiovascular, neuroscience, and stem cells.

Abnova supplies total solutions to researchers in multidisciplinary areas with antibodies, recombinant proteins, antibody pairs/kits and fish probes.

An extensive catalog of validated neuroscience antibodies and a suite of services governed by a stringent and long-established Quality Management System.

Arigo Biolaboratories offers quality antibodies, Antibody Duos and Panels (Ferroptosis/Oxytosis, Pyroptosis, Necrosome, NLRP3 Inflammasome, Exosome), recombinant proteins and ELISA/Multiplex ELISA kits.

Assay Genie is a global life science reagents company with over 120,000 products, including different types of antibodies (primary and secondary, knock-out validated antibodies, flow cytometry antibodies, anti-tag antibodies, ChIP and epigenetic antibodies).

BD Biosciences supplies antibodies for flow cytometry, Western Blot and Immunohistochemistry, proteins, ELISA kits & ELISPOT, supporting the work of researchers and clinicians.

Biomarker assays and reagents for the early detection of cancer, for use in clinical and research settings.

Antibodies

proteintech® Antibodies & Immunoassays

- Primary antibodies against 13,500+ human targets
- CoraLite® conjugated antibodies for immunofluorescence
- Secondary antibodies
- NeutraKine™ neutralizing antibodies
- ELISA kits
- Loading control and isotype control antibodies
- Western blot and flow cytometry supporting reagents
- FlexAble Antibody Labeling Kits
- IHCeasy Ready-to-use kits
- Cell separation kits

ptglab.com

Bioserv offers monoclonal and polyclonal antibody production services, bulk production services, hybridoma sequencing, cell line banking and storage, additional post-purification processing and modifications, protein analytics.

COSMO BIO Co., LTD.
Inspiration for Life Science

Cosmo Bio provides quality life science products from leading Japanese manufacturers to laboratories and research institutes. Most antibodies are specially selected for some novel characteristics whether it be target specificity, performance, filling an unmet need.

exbio

EXBIO manufactures and supplies antibodies for world-wide distribution. Sales on OEM basis and in bulk quantity is the core business activity of the company. Strong Research & Development for hybridoma technology, construction of recombinant proteins and antibodies.

GenomeMe®

GenomeMe Lab Inc. is a Vancouver-based biotech company specializing in mouse and rabbit IHC (immunohistochemistry) monoclonal antibodies for clinical diagnostic use.

Bio X Cell is the leading supplier of ultra-pure antibodies targeting both well-characterized and novel murine antigens in the large quantities required for in vivo preclinical studies. These antibodies are well established and have extensive publication records. Outstanding prices with exceptional customer and technical support.

innovative tools around dendritic cells

DENDRITICS

Dendritics supplies tools for research and diagnostics such as monoclonal antibodies targeting dendritic cells and their micro-environment, kits for multi species B cell activation and immortalization (Blood B Booster), monoclonal antibody production and B cells immortalization.

Antibodies, purified Antigens, ELISA Kits and Specialty Research Products including CDs, Cardiac Markers, Cytokines & Growth Factors, Drugs of Abuse & TDM, Fertility & Pregnancy, Hormone/Steroids, Infectious Diseases, Neuroscience, Tumor Markers and much more.

IMMUNOSTAR
Antibodies that Shine

ImmunoStar provides primary polyclonal and monoclonal antibodies for the detection of a wide variety of biological markers including Parkinson's disease, Alzheimer's abnormalities, epilepsy and brain seizures, schizophrenia, Lou Gehrig's disease and Huntington's disease.

immusmol

Immusmol develops antibodies and immunoassays capable of detecting amino acids, saccharides, neurotransmitters and neuromediators, lipids, toxins in various types of biological materials (cells and lysates, tissues and homogenates, culture supernatants, plasma and serum samples).

MONOSAN

The MONOSAN portfolio contains high quality monoclonal and polyclonal antibodies and detection kits for IHC and IF use on frozen and FFPE tissue sections. The 7ml and 15ml monoclonals (rabbit and mouse) and polyclonals are applicable for fully automated IHC systems as well as manual use.

Nordic BioSite

Optibodies™ are a series of monoclonal antibodies developed by Nordic BioSite as IHC biomarkers in clinical pathology working for different protocols and platforms with standard buffers.

MERCK

Merck, Millipore, Calbiochem, Novabiochem, and Novagen: a range of life science research products as antibodies, biochemicals and inhibitors and peptide synthesis reagents.

nanoTools

ANTIKOERPERTECHNIK

Manufacturer of phosphorylation and modification - state specific monoclonal antibodies and other innovative reagents for Signal Transduction and Alzheimer research, high throughput screening (HTS) and proteomics.

PROGEN

Supplier of high quality and reliable AAVs, antibodies, density gradient media, antigens and controls, molecular biology reagents, ELISAs, Phage display. PROGEN commitment to scientists is to support them in making new scientific discoveries and groundbreaking research within the life sciences and gene therapy.

Higher Affinity | Higher Sensitivity | Higher Specificity

ProSci offers a broad catalog of antibodies, recombinant proteins, lysates and custom monoclonal, polyclonal and recombinant antibody services. Reagents for immunochemical assays, including cell line lysates, tissue lysates and peptides as control antibodies are also available.

PTM Biolab leads the industry in creation of post-translation modification (PTM) antibodies and supplies the world's largest collection of PTM pan and histone site-specific antibodies. The product line now features antibodies of more than 10 types of novel acylations, including lysine lactylation, crotonylation, succinylation, β -hydroxybutyrylation, etc.

RevMAB Biosciences USA, Inc is focused on the generation of recombinant monoclonal antibodies developed from a broad range of antigen-specific B cells by using a revolutionary technology that does not require cell fusion and hybridoma generation.

Stressmarq Bioscience portfolio includes antibodies and antibody conjugates employed across a range of biomedical research fields including neuroscience, cancer research, cell signaling, metabolism, immunology and cardiovascular disease. Expert in oxidative stress, heat shock proteins and DNA damage.

BioCell

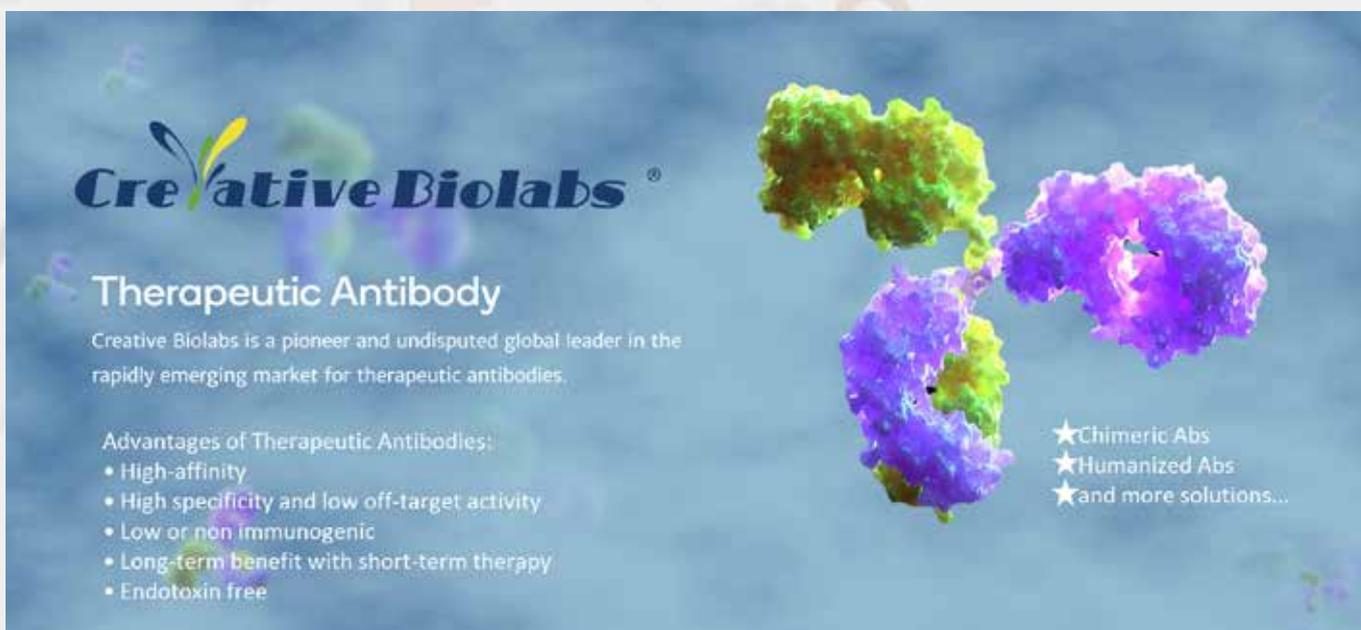

Antibodies for *in vivo* Research Since 1997

PRODUCT CATEGORIES

- Immune Checkpoint Blocking Antibodies
- Mouse Cell Specific Depletion Antibodies
- Cytokine Neutralizing Antibodies
- Biosimilar Antibodies
- Recombinant Antibodies
- Contract Services

PRODUCT FEATURES

- Exceptional Purity
- Pathogen Free
- Ultra-low Endotoxin Level
- Advanced Binding Validation
- Low Protein Aggregation
- Matching Isotype Control Antibodies

Creative Biolabs®

Therapeutic Antibody

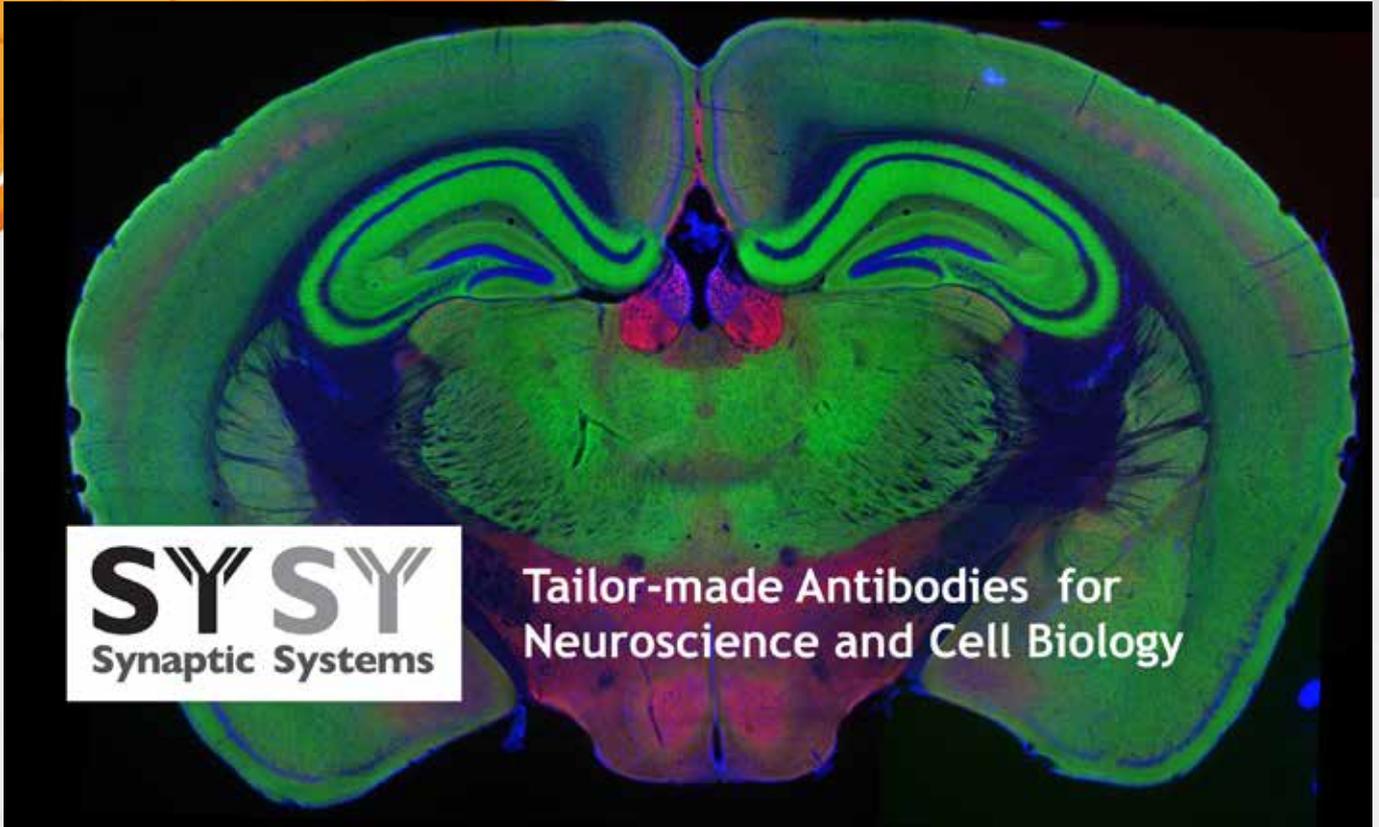

Creative Biolabs is a pioneer and undisputed global leader in the rapidly emerging market for therapeutic antibodies.

Advantages of Therapeutic Antibodies:

- High-affinity
- High specificity and low off-target activity
- Low or non immunogenic
- Long-term benefit with short-term therapy
- Endotoxin free

- ★Chimeric Abs
- ★Humanized Abs
- ★and more solutions...

Antibodies

SYnAbs manufactures innovative monoclonal antibodies against poor immunogenic compounds (steroids, small molecules, carbohydrates, epigenetic modifications) and complex antigens (GPCR, ion channels, toxins and transporters).

The Native Antigen Company develops and manufactures premium quality antigens and antibodies for infectious disease research and development, particularly for diagnostic procedures and biopharmaceutical industries. Their portfolio also includes virus-like particles and receptors, toxins, immunoassays, veterinary, conjugation and labeling kits.

Vector Laboratories is a trusted source of affinity-purified antibodies for immunohistochemistry, immunofluorescence, in situ hybridization, blotting, microarray, ELISA and other applications. Anti-Avidin/Streptavidin reagents, antibodies to tags and labels, secondary and control antibodies available.

Zeta Corporation develops highly specific and sensitive IVD antibodies for Pathology/IHC on FFPE tissue sections against different human diseases helping pathologists in diagnosing human tumors and diseases. Specifically, Zeta designs and manufactures tumor-specific biomarkers using cutting-edge technologies to uniquely select the immunogens for MonoSpecific monoclonal antibodies.

MS
Validated Antibodies

Recombinant & Native proteins, Tagged and Conjugated Proteins, Animal-free proteins, Peptides, Enzymes, Purification & Extraction Reagents

humanikine® Cytokines and Growth Factors

- Created in HEK293 cells using animal-free components
- High lot-to-lot consistency
- Endotoxin-free, xeno-free, and tag-free
- GMP grade available for cell therapy manufacturing

ptglab.com

ANASPEC

AnaSpec offers expertise in peptides, detection reagents, antibodies, assay kits, oligonucleotides, qPCR kits and GMP solutions for basic research, high-throughput screening, and drug discovery.

anatrace

Detergents & Lipids for Membrane Protein studies

Molecular Dimensions

Products for Structural Biology research

BACHEM

Developer and manufacturer of biologically active peptides, oligonucleotides, amino acids derivatives and reagents. Bachem provides products for research, clinical development and commercial application to pharmaceutical and biotechnology companies worldwide.

BPS Bioscience

Scientist Founded, Scientist Driven

Manufacturer of over 4000 products including recombinant proteins (Biotinylated), active recombinant enzymes, enzyme complexes, recombinant cell lines, biochemical and cell-based assays. Screening & Profiling services and large-scale bulk quantities.

CREATIVE BIOMART®

Creative Biomart is focused on developing high quality protein products and efficient protein manufacturing techniques (recombinant proteins, native proteins, cell and tissue lysates, chromatography reagents, lectins, assay kits). Provider of custom protein services such as protein analysis, screening and profiling and biopharmaceutical solution.

Creative Enzymes

Manufacturer of zymogens, food-grade enzymes, coenzymes, cellular extracts, probiotics and lipids. Creative Enzymes supports academic and commercial laboratories with services such as enzyme discovery, enzymology assays, enzyme expression and purification, industrial enzyme production.

Proteomics

Acro
BIOSYSTEMS

Where Proteins and Innovation Advance Biomedicine

The diagram includes the following categories: COVID-19 Products, Virus Proteins, T4 Receptor Proteins, ABC Targets, Immune Checkpoint Proteins, B2B Targets, Cytokines, Cell Therapy Targets, Cell and Gene Therapies, Therapeutic Drugs, Infections, Biologics and Vaccines, Lab Service, and Antibody/Protein/Cell Assays.

GenScript offers gene, peptide and protein services, custom antibody production for many applications including genome editing and drug discovery.

Creative Proteomics provides metabolomics, proteomics, glycomics and bioinformatics analysis services to researchers in the pharmaceutical, biotechnology, agriculture and nutrition industries. Flow cytometry service, peptide mapping, host cell protein (HCP) analysis are also available.

MedchemExpress manufactures biochemicals, inhibitors, agonists, recombinant proteins, modulators & bioactive screening libraries for many research areas such as cancer, cardiovascular and neurological diseases, endocrinology, metabolic disorders.

Oxford Expression Technologies is a biotechnology company in the recombinant protein expression field, and a recognised centre of excellence for baculovirus expression.

Growth factors for stem cells

Culture with confidence

All Qkine products have:

- High-quality and are animal-free
- Exceptional bioactivity and purity
- Full documentation available

Signaling You to The Right Path

Kinases | CRISPR | Ubiquitins | Epigenetics | TAU Proteins | COVID-19 | ELISA Kits | Antibodies

PEPROTECH
OUR SUPPORT. YOUR DISCOVERY
Part of Thermo Fisher Scientific

Cytokines and Recombinant proteins for: Immunoregulatory Proteins, Interleukins, CSFs, Growth Factors, Chemokines, Interferons, Adipokines, TGF β / BMP Proteins, Neurotrophins, FGFs, TNF Ligands/ Receptors, Defensins, ELISA kits.

Protein Ark

Chromatography columns, Resins (Ni-NT, GST, Protein A), Spin column and concentrator, IPTG, quick (Coomassie) and real-time stain, services (columns packing, protein expression etc.).

SeLENOZYME

SeLENOZYME provides recombinant selenoproteins by using a cutting-edge technology. This recombinant system allows the production of purified and active selenoproteins (more than 25 selenoproteins). Recombinant selenoproteins present a specific activity very close to that of native enzymes purified from tissues.

Worthington
Biochemical Corporation

Worthington is a primary manufacturer of enzymes and biochemicals for life science research, primary and stem cell isolation, bioprocessing, biopharma, diagnostics and biotechnology applications. Main research areas are: cell and experimental biology, neuroscience, molecular biology, plant biology, vaccine production and regenerative medicine.

abbexa

Protein and Peptides | Isotype Control | ELISA Kits | Antibodies

GlycoSelect

Recombinant Prokaryotic Lectins (RPLs)

Biopharmaceutical | Diagnostic & Research | Food Industry | Cosmetics

Kits

ELISA, CLIA, Assay kits, Rapid Tests

AAT Bioquest®

Fluorescent and luminescent probes for labeling small drug molecules and biopolymers and for detecting proteins, nucleic acids and live cells. Physiological and neurological probes, such as calcium indicators and membrane potential probes.

CELL BIOLABS, INC. *Creating Solutions for Life Science Research*

High quality products that facilitate discovery of the mechanisms underlying cell function and disease: Oxidative Stress Assays, Cell-Based Assays, Viral Expression and Purification Reagents, Small GTPase Kits and Reagents.

CUSABIO®

Over 10000 kinds of ELISA kits for 37 species; over 6000 antibodies, high-quality recombinant proteins through the prokaryotic and eukaryotic expression systems; small molecule antigens and standards used in drug residues, food safety and excellent proteins and antibodies for diagnostic use.

de mediatec

Supplier for diagnostic test kits to be used in the clinical laboratory and in research labs. ELISA and Rapid Test for Human and Veterinary, Diagnostics, Endocrinology – especially Salivary Diagnostics, Infectious Diseases, Autoimmunity, Biogenic Amines, Tumor Markers and Food Analytics.

abbexa

Abbexa, a Cambridge Science Park, UK company providing biological tools for the life science, pharmaceutical development and biotechnology sectors with primary antibodies, secondary antibodies, proteins, ELISA kits and enzymes as well as other kits and tools for use in research. High quality, tested products for the biomedical research market.

CD **Creative Diagnostics®**

Leading manufacturer and supplier of antibodies, viral antigens, innovative diagnostic components and critical assay reagents. Contract biologic R&D and manufacturing services to the diagnostic manufacturers along with GMP biologics manufacturing for the biopharmaceutical market.

CYGNUS **TECHNOLOGIES** part of Maravai LifeSciences

Cygnus Technologies provides the biotechnology and biopharmaceutical industry well-validated, convenient to use microtiter plate ELISA methods to detect Host Cell Proteins from specific recombinant expression systems and bioprocess contaminants used in culture media as well as transgenic expression systems in goats and cattle.

TECAN

ELISA kits for research and diagnostic in the fields of neuroscience, endocrinology, oncology, infection diseases, autoimmunity, immunology and neurodegeneration.

Mercodia.

Developing high quality immunoassays for research within the field of metabolic disorders

- ELISA Assay Portfolio: Human, Rat&Mouse, Larger animals
- ELISA Assay for Metabolic disorders: Diabetes, Obesity, Cardiovascular diseases
- Bioanalytical Services
- ★ The most Sensitive Glucagon Assay on the market

KALON Biological

Non-capture ELISA assays for virology, parasitology and inflammation, ELISA assays to support the surveillance of vaccine-preventable diseases such as measles, mumps and rubella. Sample types are oral fluid, plasma and serum, diagnostic kits for haematology, stains for microscopy, and laboratory reagents.

vector LABORATORIES

Vector Laboratories supplies kits for Immunohistochemistry (IHC) and immunocytochemistry (ICC), protein and nucleic acid blot detection, in situ hybridization detection (ISH), enzyme immunoassays (ELISAs) and neuronal tracing. ABC kits, autofluorescence quencher kits, endogenous biotin blocking kits, enzyme polymer detection kits and conjugation kits are used by researchers from all over the world.

HEV DIAGNOSTICS

•HEV-IgG •HEV-IgM •HEV-Ab •HEV-Ag

Hepatitis E virus
-- an emerging health threat

Leading brand in blood transfusion and infectious immunology

Global leader in hepatitis E diagnostics

Health monitoring ELISA assays including all of the common pathogens such as MHV, TMEV, PVM, Sendai, EDIM, and MAD. Xpressbio provides also unique assays such as Native MPV, Native RPV, Pasteurella, and Helicobacter. Customizable Multiplex ELISA Assays totally unique in the industry, up to 6 different results from 1 well.

ZellBio is well-trusted developer and manufacturer of high quality products such as bioassay kits, EasyAssays, molecular biology kits and reagents for plant research.

Salivary

KITS & TOOLS

Salivary biomarkers Elisa kits (Estradiol, DHEA, Cortisol, Progesterone, C-reactive Protein, etc) and Saliva collection supplies.

DNA Swabs, DNA Saliva Collection devices and many DNA Isolation, Stabilization and associated kits.

PanReac AppliChem

ITW Reagents

Wide range of biochemicals for biochemistry, cell biology, microbiology, and molecular biology. Reagents for decontamination, reference standards for environmental analysis, services and custom synthesis of organic and inorganic compounds.

FOCUS BIOMOLECULES

Focus Biomolecules manufactures cutting-edge biochemical reagents and probes for the life sciences research community. Their key areas include cell signaling, epigenetics, cellular metabolism, GPCRs and nuclear receptors. They also provide custom synthesis, peptide synthesis, probe design and synthesis, bioactive chemical compound library production and other custom services.

FUJIFILM Wako

Value from Innovation

Fujifilm Wako is a world-renowned supplier of high purity laboratory chemicals and reagents including more than 40,000 high quality products for research and development.

SIGNALCHEM

SignalChem is a biotech company focused on the research, development and production of innovative and high-quality human recombinant cell signaling products. Core expertise in cellular signaling, molecular biology and protein biochemistry to generate more than 2,000 functional protein products (protein kinases, active phosphatases, epigenetic enzymes and many others).

Toronto Research Chemicals

products for innovative research

Toronto Research Chemicals offers an extensive catalogue of 350,000 products supporting researchers in the biomedical fields with specialized complex organic molecules. Product portfolio includes analytical standards, natural products APIS, Impurities & metabolites and more than 21,000+ stable labelled standards. These products are used in numerous applications, including forensic science, environmental analysis, and pharmaceutical and medicinal R&D.

The basis for breakthroughs

High-quality plasmid DNA, proteins, enzymes, antibodies and Cas9 research projects to help achieve groundbreaking advancements in life science.

bimake.com

Bimake.com is a biotech company that provides best-in-class supplies and reagents commonly used in experimental laboratories for medical and biological research. Their mission is to best serve the research community around the globe with unbelievable cost savings and with high quality products.

BIOTECHNOLOGY
Creative Biogene

Manufacturer and provider of genomics and proteomics products and services. Transfected stable cell lines, Virus particles, clones, CRISPR/Cas9 Gene Editing Platform, Aptamers, RNA Interference Products.

EdgeBio

Manufacturer of a wide range of Sanger sequencing reagents and consumables to lower overall cost of sequencing (removal of Terminators, Adhesive Plate Sealers, 96-well optical plates), PCR amplicon purification, Bacterial genomic DNA isolation, Chemical competent bacterial cells, EnzSAP (alternative to Exosap).

Gene Link[™]

RNA interference, Gene detection systems, first strand sDNA, random primers, adaptors, linkers, primers, RT-PCRmer[™], OligoProber[™], Genetic Tools & Reagents, PCR products.

Genlantis

Genlantis provides reagents for Transfection (DNA, siRNA, neuronal, protein delivery and high throughput transfections), RNA Interference and Gene Silencing (siRNA generation kits and Dicer enzyme kits).

QIAGEN[®]

Qiagen offers DNA and RNA extraction kits for purification of high-quality DNA and RNA. Protein isolation kits from biological samples (blood and tissue) for purification of ultrapure proteins are also available.

A complete solution for DNA, RNA and protein preparation

- Ready-to-use protocols
- Higher Yields, Consistent Quality, Super Fast
- DNA, RNA and proteins ready-to-use in downstream applications

VECTOR BIOLABS

Your Trusted Partner in Gene Delivery

Ready-to-use, pre-made recombinant adenovirus and AAV, including recombinases, fluorescent control markers/reporters, miRNA, shRNA, sgRNA, and CRISPR/Cas9. Custom services for recombinant adenovirus and recombinant adeno-associated virus (AAV), including vector design/cloning, packaging/production, amplification, purification, and titration.

VectorBuilder.com

VectorBuilder has developed an easy-to-use web-based interface with a huge collection of vector backbones, promoters, ORFs, tags and fluorescent markers, which enables truly custom cloning with just a few mouse clicks and offers high quality virus production (Lenti, Adeno, AAV, MMLV, MSCV and Baculovirus), BAC modification, cDNA/shRNA/CRISPR libraries and stable cell line generation.

VIAGEN BIOTECH

Leading provider of innovative DNA extraction technologies. DirectPCR® DNA Extraction System is a single-tube system for rapid preparation of DNA from mouse tails, ear pieces, yolk sac, and culture cells. The system allows the resulting DNA extracts to be compatible with genomic PCR for genotyping.

Molecular Biology

AddexBio provides a variety of high quality and specialized human and animal cell lines, various primary cells, immortalized cells, cell culture media and reagents, and cell-derived molecular biology products for the research community.

AthenaES® is a manufacturer and supplier of biotechnology reagents for research, pharmaceutical and industrial applications. Products include: protein expression & folding kits, cell culture reagents, specialty proteins, enzyme assays, chromatography.

Major suppliers of quality animal sera, from a large variety of species. Cell culture sera and associated reagents and also control matrices and disease state material.

A wide range of high quality cells, cell culture medium (chemically defined media, reduced serum media) and media supplements, FISH probes, tissue arrays, microorganisms and equipments. Cell, biosample and histology services available.

AMSBIO provides cells and cell culture products, kits and assays, custom monoclonal antibody production, custom protein expression and polyclonal antibody services. The brand includes Zymolyase, Cellufine, Cultrex, Alvetex, RNAbee and RNASTat.

BIOSERA offers high quality animal serum, including fetal bovine serum, and ancillary cell culture products (salts, salt solutions & buffers, antibiotics, trypsin, glutamine, amino acids and vitamins). Products manufactured according to ISO 9001 and 13485 standards.

Cell Culture Technologies

Cell Culture Technologies offers technology transfer programs to generate recombinant glycoproteins, monoclonal antibodies, viral particles and cells in fully synthetic culture environments.

HansaBioMed Life Sciences Ltd offers the widest choice and selection of products dedicated to exosome research for Life Science applications available on the global market: exosomes and microvesicles, EV Isolation tools, TFF filters, antibodies, RNA EV isolation, EV characterization kits.

Genlantis

Genlantis offers a comprehensive line of specialty products applicable to the areas of transfection/transformation, gene expression, gene silencing, RNA interference, primary cell culture, sterilization, protein expression systems and proteomics.

Life Science Market is a supplier of life science reagents covering a growing variety of ELISA kits, proteins, peptides, antibody products.

PANTM BIOTECH

Your expert around cell culture. Company manufacturing first-class quality products and excellent service for cell culture like sera, media, serum-free systems, biologicals & other reagents. PAN-Biotech guarantees highest quality at competitive prices.

USBiological Life Sciences

USBiological supplies cell culture media manufactured in accordance with ACS, USP, EP compendium specifications (Insect, Microbiological, Molecular Biology, Nematode, pEX Protein Expression, Plant and Yeast Media). They produce any custom formulation from small research quantities to industrial bulk scale.

iXCells Biotechnologies offers high quality primary and iPSC-derived cells, custom iPSC services, functional bioassay development and execution.

NEUROMICS

Reagents and methods for the Neuroscience and Stem Cells Research. Also experienced in Diabetes-Obesity, Immune Response, Endocrinology, Apoptosis Detection and Cardiovascular and Cancer Research. Products include antibodies, assays, primary neurons, astrocytes, chondrocytes, neural progenitors and mesenchymal stem cells.

TNCBIO supports the demand for a fully animal component free replacement for FBS by presenting XerumFree, an efficient and fully defined cell culture supplement. No animal or human-derived material, no lot-to-lot variations.

Basic tools to support stem cell research and clinical studies of MSCs. Vitrobiopharma portfolio includes both native MSCs and various derivatives, our MSC-GroTM specialty cell culture media for support of growth and differentiation of MSCs. Cell lines include native mesenchymal stem cells, Cancer-Associated Fibroblasts (CAFs) & native fibroblasts for advanced cancer research.

Veterinary

Assay Genie provides an extensive library of over 10,000 highly validated Veterinary ELISA kits for large animals (ruminants, equine and swine species), small animals (lab animals, companion animals, avian and aquatic species). DIY (Do-It-Yourself) ELISA kits also available to quantify analytes in a variety of sample types covering multiple species including: monkey, mouse, rat, dog, horse, cat, goat, chicken, ferret, zebrafish, dolphin, guinea pig, rabbit and many more.

Cloud-Clone Corp. supplies over 7000 ELISA kits for a wide range of species including simian, porcine, mouse, caprine, gallus, rat, ovine, canine, equine, bovine species etc. Sandwich and Double Sandwich ELISA Kits, Competitive Inhibition ELISA Kits, Instant ELISA, Mini Samples ELISA kits are available.

Kingfisher Biotech, Inc. is specialized in basic veterinary and animal model research. Offered products include recombinant proteins, polyclonal and monoclonal antibodies, Do-It-Yourself and RTU ELISA kits for over a dozen species.

Mercodia is a world-leading developer, manufacturer and distributor of high quality immunoassays, notably within the area of metabolic disorders (diabetes, obesity and cardiovascular disease). They offer assays applicable in human, rat, mouse and larger animal models (bovine, canine, equine, feline, ovine and porcine).

Innovative and rapid detection systems for pathogens, spoilage organisms, genetically modified organisms (GMOs) and allergens by real-time PCR. The foodproof® and microproof® product lines also include kits for sample preparation. ELISA kits for allergens detection also available.

COSMO BIO Co., LTD.
Inspiration for Life Science

Cosmo Bio provides innovative food quality and safety products suitable for juice quality control, nutrients, flavors, pigments, allergens, antibiotics, pathogens. Guaiacol detection kit, food allergen screening test kit, Deoxynivalenol (DON) ELISA Kit and L-Glutamate assay kits available.

CUSABIO offers a wide range of diagnostic kits for food safety. ELISA kits are especially designed to meet high quality demands in feed and food testing focusing mainly on natural and artificial chemical contaminants. Antibiotics, mycotoxins and hormones testing solutions are their main lines.

Lifasible is specialized in agricultural science, offering a wide variety of agro-related services and products for environmental and energy solutions.

Supplier of collagen hybridizing peptide (CHP) that specifically binds to unfolded collagen chains, enabling unlimited laboratory applications in pathology, biomechanics, cell biology, regenerative medicine, and more.

Aviva Systems Biology provides antibodies, recombinant proteins, peptides, Western Blot reagents, ELISA kits for apoptosis, cancer, cell differentiation, neuroscience, stem cells and more.

Biotium is a leading provider of innovative fluorescence detection technologies and products for life science research such as molecular biology products and accessories, antibodies, conjugates and labeling, cellular stains and assays, protein detection and analysis.

Chondrex, Inc. is specialized in the biochemistry and immunology of collagen and collagen-related materials. Collagen, collagenase, monoclonal antibodies and various assay kits for use in allergy, arthritis, connective tissue, nephritis related inflammation research, cancer research and cell metabolism.

Aurion develops and manufactures a comprehensive line of the highest quality immuno gold and auxiliary reagents: conventional gold conjugates as well as signature products such as sub-nanometer Ultra Small immuno gold conjugates, R-Gent SE-EM, an electron microscopy grade silver enhancement reagent and Aurion BSA-c™, an incubation buffer additive for minimizing background.

Bioclone Inc. provides affinity magnetic beads, reversed-phase beads, ion exchange beads, antibody purification and IP, antibody and peptide immobilization, recombinant protein purification, DNA/RNA purification.

Detroit R&D specializes in environmental health, hypertension and cancer related research, including biologically active eicosanoids, COXs, CYPs, glutathione S-transferases, oxidative stress, DNA damage. Product portfolio includes ELISA and Assay Kits, Antibodies, Biotarget Hypertension ELISA.

chromotek[®] Nanobody-based Reagents

- Smallest known antibodies (~12-15 kDa) for higher resolution imaging
- High binding affinity, low background in IP and IF
- Exceptionally stable, recombinantly expressed

GenHunter

A New Frontier in BioSciences

GenHunter offers innovative products and services for AP-TAG ligand-receptor identification and differential display gene expression analysis. They also provide antibodies, cell culture, RNA and PCR cloning products, PerfectWestern containers, membranes and miscellaneous equipment.

PROLYTIX
Biotherapeutic Experts
From Discovery to Delivery

Haematologic Technologies

INCORPORATED

Haematologic Technologies manufactures high quality, plasma derived coagulation proteins (human, murine, bovine), antibodies, factor deficient plasmas and blood collection tubes intended for in vitro research use.

INNOVEX biosciences

Revolutionary products for simple, fast and background-free IHC staining of human and animal tissues. Innovex's IHC systems complete the staining process in 60 minutes for human tissues and 90 minutes for animal tissues.

Matexcel is a leading service provider in materials science, with years of commitment to supply better polymers, nanoparticles and other materials for worldwide customers from both academia and industry.

FUJIFILM

Metabolism Research

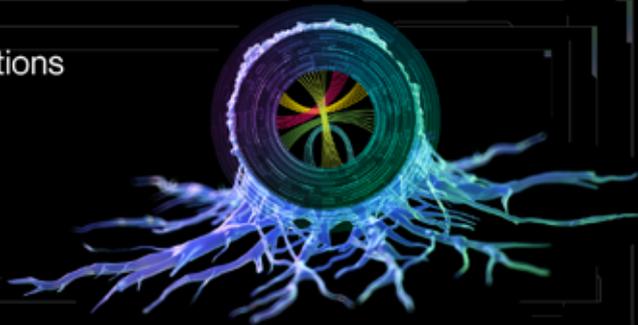

Antibodies & ELISA kits

Miscellaneous

Solutions for Samples, Sample Preparation & Analysis

- ◆ Frozen & Paraffin Tissues
 - ◇ Arrays / Panels / Matched Pair Sections
- ◆ Extraction Kits
- ◆ Nucleic Acid Analysis Services
- ◆ Liquid Biopsy Products
- ◆ gDNA / cDNA / RNA Extracts
- ◆ Tissue Protein Lysate

More than 55,000 products in the field of life science: biochemicals, labware, instruments, antibodies (Cappell brand), kits and reagents. Best sellers: Colitis grade Dextran, Mycoplasma removal agent, FASTPREP homogenizer with lysing matrix and complete kits for DNA, RNA and protein extraction (from soil, feces, plants, tissues, fungal/bacterial, etc.).

Functionalized biopolymers, nanoparticles, labeled proteins, antibodies, enzymes, peptides and nucleotides, rich arrays reactive molecules for fluorescence labeling, PEGylation, biotinylation and bioconjugation.

ProImmune's early products were Pro5[®] MHC Pentamers, which are used to detect epitope-specific immune cells so that they can be analyzed in human blood samples. Pentamers as well as ProT2[®] MHC Class II Tetramers introduced in 2016 continue to be part of ProImmune's core business.

USBiological supplies biochemicals (organics, drugs, analogues, inorganics, isotopes), biologicals (human and animal cells, lysates, plasma, serum and tissues), cDNA, enzymes, kits and assays for apoptosis, autoimmune diseases, hormones, infectious diseases and more.

Specialist Blood Collection Tubes

BD CPT™ Cell Preparation Tube	PAXgene®	BD™ P800	BD™ P100
Integrated Ficoll™ gradient and gel barrier enables fast and reproduceable isolation and stabilisation of Monocytes and Lymphocytes	Immediate stability of intracellular blood RNA, cell free DNA, or genomic DNA	A protease inhibitor mixture stabilises GLP-1, glucagon, OXM & GIP for diabetes and obesity research	Protease inhibitors and mechanical separator enable optimal blood plasma protein stabilisation
362780 CPT Heparin 16 x 125 mm, 8 mL	762165 PAXgene RNA 16 x 100 mm, 2.5 mL	366421 Spray dried additive 16 x 100 mm, 8.5 mL	366448 Mechanical separator 16 x 100 mm, 8.5 mL
362782 CPT Citrate 16 x 125 mm, 8 mL	768165 PAXgene ccfDNA 16 x 100 mm, 10.0 mL	366420 Spray dried additive 13 x 75 mm, 2.0 mL	366422 No separator 13 x 75 mm, 2.0 mL
362781 CPT Citrate 13 x 100 mm, 4 mL	761165 PAXgene DNA 13 x 75 mm, 2.5 mL	Additive: K2EDTA / Protease, Esterase and DPP-IV Inhibitor	Additive: K2EDTA / Protease Inhibitor
IVD / CE	IVD / CE	RUO	RUO

Together we breakthrough™

At Vector Laboratories, we empower scientific curiosity with innovative proteomic and glycomic solutions to help you move your science forward, with impact.

Immunohistochemistry

Reliable reagents delivering high sensitivity and low background.

Immunofluorescence

Reliable reagents delivering high specificity and reduced autofluorescence.

Glycobiology

Accurate and reproducible profiling, characterization, and capture of complex glycans.

Bioconjugation

Reliable and quantifiable labeling delivering ready-to-use conjugates at high yield.

Custom & Service

Compound Screening Profiling and Libraries

Custom CAR-T Cell Development

CAR Design & Construction

Fluorescent *In Situ* Hybridization (FISH) Service

Custom Peptide Services

Research Vector Services & Viruses

Vector Cloning, Plasmid DNA Preparation, Lentivirus, Adeno-Associated virus, Adenovirus, shRNA Target Design

Custom Oligo and qPCR Probe synthesis

Custom Antibody Production

Mouse and Rabbit mAb, Rabbit pAb, Recombinant Abs

On-Demand Bioanalytical Services

PK&PD Analysis, Biomarker Analysis, Assay Development & Optimization, Immunogenicity Testing, Reagent Characterization & Control
